

Spring Break STEM Camp

Dates: March 19 - 23
Times: 9am - 4pm daily
Grades: 5th - 7th
Cost: \$950 for the week

Exploring Ecological Systems

The region is in crisis — populations of certain local animals are declining, for no obvious reason. It's up to you to figure out what is happening and how to prevent a looming catastrophe. As you do so, you will learn the real-world tools and techniques environmental scientists use to solve such mysteries, and you will gain a deeper understanding of how all the separate components of an ecosystem work together.
